## **Locally Led Impact Monitoring, Evaluation, and Learning**

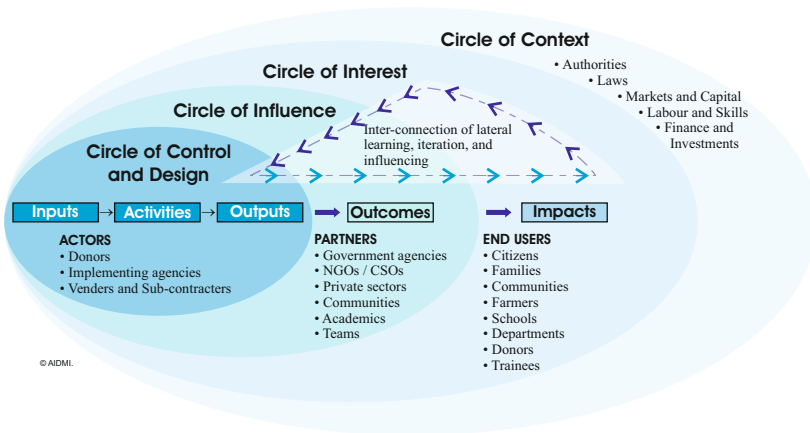

On average each year All India Disaster Mitigation Institute (AIDMI) conducts 7 to 17 local impact monitoring, evaluation, and learning studies around the themes of humanitarian action, disaster risk reduction, and climate change adaptation in India covering 300 to 3000 affected population and stakeholders in agriculture, urban, water, education, and more.

How does AIDMI co-creates the process? And how partners and stakeholders are engaged in this process to lead and shape it? This brochure offers two visuals and key examples as a first step.

Activities of AIDMI  
May 2023

*“National capacities in the end are stand on local capacities.”*
