AIDMI's Risk and Resilience Programme

Building Safer Communities through Risk Reduction, Resilience, and Local Action

"Transforming risk into resilience through local action, evidence-based planning, and community leadership."

ALL INDIA DISASTER MITIGATION INSTITUTE

AIDMI's Risk and Resilience Programme of Two Decades

2008–11

- Commonwealth Foundation workshop on Asian Agenda on Climate Change
- Arid Area Farmer's Local Seasonality Fund in Gujarat
- Climate Smart Disaster Risk Management approach
- Livelihood restoration in Ladakh
- Delta programme development in India
- Policy engagement with UNOCHA, UNDP, Oxfam, and Earth Institute

2012

- Contributed to the IPCC SREX Global Report
- Worked on insurance and resilience in coastal India
- Advanced Climate Smart Disaster Risk Management
- Studied community-based microinsurance
- Supported DRR–CCA Training of Trainers in Assam
- Conducted a study on urban floods in Guwahati

2013-14

- Conducted a study on urban floods in Guwahati
- Studied the effectiveness of microinsurance after Cyclone Phailin
- Conducted a scoping study on disaster risk reduction needs in higher education
- Undertook a DRR development study in Odisha
- Supported ecology-based community livelihood restoration in Ladakh
- Contributed to UNDP and MoHA consultations in India to inform HFA 2
- Supported programme development for deltas in India

2015

- Disaster insurance demand survey for urban informal businesses
- Workshop on upgrading State Disaster Management Plan
- DRR–CCA training needs assessment in Odisha
- Baseline study on community resilience in Assam
- DRR–CCA pilot Training of Trainers in Odisha

2016

- Developed the Andhra Pradesh DRR–CCA roadmap
- Supported NDC implementation work in five Indian states
- Prepared climate-informed District and City Disaster Management Plans in Andhra Pradesh
- Integrated DRR and CCA into planning processes
- Developed a curriculum framework for the State Institute of Disaster Management, Odisha
- Prepared the India case study report on loss and damage from climate change

2017

- SIDM Odisha curriculum framework
- India case study on loss and damage from climate change
- South Asia Disaster Report
- National roundtable on successive droughts
- DRR–CCA capacity strategy in Himachal Pradesh
- Long-term recovery learning with Oxford Brookes University

2018

- Small business risk transfer
- Inputs to AMCDRR panels
- Work on heat impacts on children
- Systems approach to air pollution
- Addressed climate change uncertainty in dryland Kutch and delta areas
- Urban governance and community resilience
- Enhanced institutional and community resilience to disaster and climate change

2019

- Women's leadership and gender equality documentation
- Case studies of women farmers from seven Indian states
- Sustainable cotton work with women farmers in Gujarat
- DRR training needs assessment for Kerala officials
- Women-led climate-smart agriculture in Gujarat
- Agriculture scoping study on small farmers

2020-21

- Women-led climate-smart agriculture
- Small farmer engagement for sustainable development
- COVID-19 recovery, vulnerability, and uncertainty work
- Education impact and local preparedness studies
- Social enterprise and lockdown impact assessments
- Co-created transformative knowledge and action

2022-23

- 9th South-South Citizenry-Based Development Academy
- Ecosystem approaches to disaster risks and climate change
- National roundtable on coastal, delta, and desert communities
- Ecosystem-based learning and resilience dialogue
- COVID-19 impact on education, local recovery, and preparedness

2024

- COP28 climate, relief, recovery, and peace work
- Internal climate finance for forest and farm producer organisations
- Five heatwave roundtables in South Asia
- Heat impact research on small and informal businesses
- Locally led adaptation by small farmers
- Climate and environmental protection in conflict-affected communities

2025

- Cotton farmer resilience working paper with IIED
- Heatwave challenges for small businesses
- Technology for landslide risk management webinar
- Extreme heat learning roundtable
- Climate extremes and anticipatory action roundtable
- COP30 action areas on climate-related displacement

2026

- Indo-Afro learning on heat, health, and livelihoods
- Heat-health protection and livelihood security
- Early warning to early action for extreme heat
- Community-centred heat resilience
- Climate-informed planning and locally led adaptation
- Small business resilience under extreme heat
- Anticipatory action for climate and disaster risks
- South–South collaboration on heat resilience

For over two decades, AIDMI has worked with communities, governments, businesses, and international partners to reduce disaster risk, strengthen climate resilience, and support locally led action across India and South Asia.

Scan to access 50+ issues of ***Southasiadisasters.net*** focused on disaster risk reduction, climate change adaptation, and their integration in policy and practice.
